This is an AI-generated analysis. All findings require licensed customs broker review before any Post Summary Correction or protest is filed. customs-agent is not a licensed customs broker; we pair with a broker partner who exercises responsible supervision and control under 19 CFR Part 111.

Executive summary

We analyzed 20 entries (22 line items) filed under your import history. We identified 6 line items where we believe the classification filed was incorrect, representing \$11,067.89 in recoverable duties. All 6 findings are within the 314-day PSC window and can be filed as a Post Summary Correction. Of the recoverable total, \$770.64 is high-confidence and \$10,297.25 is medium-confidence (broker should verify against actual product details).

What happens next

- Review the refund opportunities (next section). Each finding includes the legal reasoning and the citations the agent relied on.
- Your licensed customs broker validates each finding against the actual product before filing. We pair with your existing broker or one of ours.
- Accepted findings are filed as Post Summary Corrections (within 314 days of liquidation) or as protests (within 180 days of liquidation).
- Refunds are typically issued by CBP within 90 days of an accepted PSC.

Refund opportunities

Finding 1 · \$5,834.16 recoverable

CN-AMA-2176625-18 · entry date 2025-09-10 · within PSC window · confidence medium

Product as filed:

Smart fitness watch with heart rate monitor, GPS, color touchscreen, BT 5.0

Filed classification 8517.62.00.90 duty paid: \$7,284.53	Our proposed classification 9102.12.80.00 duty under our code: \$1,450.37
---	--

Why we believe this is misclassified:

Step 1 – Identify candidate headings. The smart fitness watch is described as having a heart rate monitor, GPS, color touchscreen, and Bluetooth connectivity.

This finding requires review by a licensed customs broker before filing a Post Summary Assessment Request under the classification's terms before action.

Finding 2 · \$2,543.56 recoverable

CN-AMA-3127793-20 · entry date 2025-08-08 · within PSC window · confidence medium

Product as filed:

Smartwatch waterproof IP68 with sleep tracking, Wi-Fi sync

Filed classification 8517.62.00.90 duty paid: \$3,175.89	Our proposed classification 9102.12.80.00 duty under our code: \$632.33
---	--

Why we believe this is misclassified:

Step 1: Identify candidate headings. The article is described as "Smartwatch waterproof IP68 with sleep tracking, Wi-Fi sync." Two headings are prima facie applicable:

Heading 9102 – "Wristwatches, pocket-watches and other watches"

This finding requires review by a licensed customs broker before filing a Post Summary Assessment Request under the classification's terms before action.

Finding 3 · \$1,919.53 recoverable

CN-AMA-9504022-07 · entry date 2026-02-04 · within PSC window · confidence medium

Product as filed:

Smart fitness watch with heart rate monitor, GPS, color touchscreen, BT 5.0

Filed classification 8517.62.00.90 duty paid: \$2,396.84	Our proposed classification 9102.12.80.00 duty under our code: \$477.31
---	--

Why we believe this is misclassified:

Step 1: Identify candidate headings. The product description is "Smart fitness watch with heart rate monitor, GPS, color touchscreen, BT 5.0." Three headings prima facie cover different types of watches:

9102 ("Wrist-watches, pocket-watches and other watches, i

This finding requires review by a licensed customs broker before filing a Post Summary Assessment Request under the classification's terms before action.

Finding 4 · \$582.90 recoverable

CN-AMA-7195891-13 · entry date 2025-07-31 · within PSC window · confidence high

Product as filed:

20W USB-C PD fast wall charger compact dual-port

Filed classification 8507.60.00.20 duty paid: \$4,949.77	Our proposed classification 8504.40.70.01 duty under our code: \$4,366.87
---	--

Why we believe this is misclassified:

Step 1 — Identify candidate headings. The article is a 20W USB-C dual ports.

This finding requires review by a licensed customs broker before filing a Post Summary classification's terms before action.

Finding 5 · \$108.62 recoverable

CN-AMA-5248288-09 · entry date 2025-07-19 · within PSC window · confidence high

Product as filed:

20W USB-C PD fast wall charger compact dual-port

Filed classification 8507.60.00.20 duty paid: \$943.98	Our proposed classification 8504.40.95.10 duty under our code: \$835.36
---	--

Why we believe this is misclassified:

Step 1 — Identify candidate headings. The article is a "20W USB-C an AC-to-DC power supply unit designed to convert mains alter portable electronic devices.

This finding requires review by a licensed customs broker before filing a Post Summary classification's terms before action.

Finding 6 · \$79.12 recoverable

CN-AMA-7002049-03 · entry date 2026-05-11 · within PSC window · confidence high

Product as filed:

20W USB-C PD fast wall charger compact dual-port

Filed classification 8507.60.00.20 duty paid: \$696.49	Our proposed classification 8504.40.70.01 duty under our code: \$617.37
---	--

Why we believe this is misclassified:

Step 1 — Identify candidate headings. The product description is "20 port." This is a power supply device with 20W output, USB-C Power wall outlet (AC mains) and convert to DC for charging

This finding requires review by a licensed customs broker before filing a Post Summary classification's terms before action.

Methodology

Classification

Each line item is re-classified from the seller's product description against the full US Harmonized Tariff Schedule. The agent applies the General Rules of Interpretation (GRI 1 through 6) in legal order — first looking at the heading terms and binding chapter/section notes (GRI 1), then specificity and essential-character analysis (GRI 3) when more than one heading applies, then descending to the 6-, 8-, and 10-digit lines via GRI 6.

Citations

Every classification cites at least one source from the candidate set returned by retrieval — either an HTS heading, subheading, or chapter note. Citations are checked against the candidate set; classifications whose citations don't ground are rejected and re-attempted.

Confidence

"High" means we would defend this classification under a CBP focused assessment. "Medium" means the heading is likely correct but the 8-digit line depends on a value tier, material tier, or named-vs-residual choice that requires broker confirmation against actual product details. "Low" means two or more chapters remain plausible. Only high and medium opportunities appear in this report; low-confidence disagreements are listed separately for broker review.

Duty calculation

Duty under both the filed and proposed classifications is computed deterministically — no LLM involved in the math. We model base ad-valorem rates, Section 301 (China) add-ons, Section 232 (steel and aluminum), Merchandise Processing Fee (0.3464%, capped per CBP's annual schedule), and Harbor Maintenance Fee (0.125% for ocean freight). Rates come from a versioned snapshot of the official USITC tariff table.

PSC eligibility window

Post Summary Corrections may be filed within 314 days of entry liquidation, which is roughly within 11 months of the entry date. Entries older than the window are flagged in the appendix — those refunds, if accepted, must be pursued through the protest process (CBP Form 19) within 180 days of liquidation.

Limits

All findings in this report are AI-generated and require licensed customs broker review before any filing. customs-agent is not a licensed customs broker; we are an AI operations platform that pairs with a licensed broker partner who exercises responsible supervision and control under 19 CFR Part 111. We do not represent any importer before CBP; we provide analysis our broker partner uses to file. Recoverable amounts assume CBP accepts each re-classification — actual recovery depends on broker confirmation and CBP review.

Appendix — all entries analyzed

Below is every entry / line item we analyzed. " " indicates we agreed with the broker's filing; rows in the opportunities section above are flagged here as refund opportunities. Low-confidence disagreements are listed at the end.

Across 20 entries (22 line items): 10 agreed (we concur with filed classification), 6 refund opportunities surfaced, 0 flagged uncertain. Entry-level detail follows.
